We don't actually use inheritance for Admins but this would be a Possiblity for Inheritance
We use a boolean in User

Admin

Post

+postId: number
+boardId: number
+title: string
+description: string
+image: image
+category: boardId

+deletePost(): void
+updatePost(): void

0..*

User

+isAdmin: boolean
+userId: number
+likedPostsList: number[]
+subcriptionsList: number[]

+deleteUser()
+updateUser()

creates

1

Post-list

+postsList: Post[]
+boardId: number

+createPost(): void

1

subscribes to

Dashboard

Subject

+ subjectName: String

1

Board

+postList: Post-list
+boardName: string
+subjectId: number

+deletePost(): void
+createPost(): void
+updatePost(): void
+submitPost(): void
